Professional Summary

Results-driven Python Backend Developer with hands-on experience in ERPNext customization, workflow automation, backend integrations, and business system development. Skilled in building scalable internal tools, automating operations, and solving business-critical problems using Python, FastAPI, MySQL, MongoDB, ERPNext, N8N, and Power Automate.

Strong expertise in rapid prototyping, API integrations, backend process optimization, and independent execution across client projects including Microsoft 365 migration, email infrastructure recovery, and enterprise automation systems. Seeking remote-first backend development opportunities with strong growth in production-grade systems, scalable architecture, and automation engineering.

Technical Skills

Programming Languages: Python, SQL, JavaScript (Basic)

Backend Development: FastAPI, REST APIs, CRUD Operations, API Integrations, Automation Scripts

Databases: MySQL, MongoDB

ERP & Business Systems: ERPNext, Frappe Framework

Automation Platforms: N8N, Power Automate, Python Automation Tools

Cloud & Infrastructure: Microsoft 365 Administration, Google Workspace Migration, Email Systems

Tools & Platforms: Git, GitHub, VS Code, Apollo, Expandi, SPF, DKIM, MFA, 2FA

Professional Experience

Backend Developer & Automation Specialist

ASZ Technologies

- Built an ERPNext-based Church Management System for workflow automation and operations management
- Developed an AI Marketing Automation Platform using N8N, LinkedIn workflows, Expandi, and Apollo
- Created Python and Power Automate tools for automated email extraction and processing

- Independently migrated Google Workspace to Microsoft 365 including emails, drives, and user management
 - Improved email domain reputation using SPF, DKIM, and email deliverability best practices
 - Managed client Microsoft 365 accounts including MFA, access control, and administration
 - Built a Python-based OBD Scanner prototype for vehicle diagnostics and issue detection
 - Developed an internal utility platform using FastAPI + React for PDF productivity tools
 - Built an eCommerce platform prototype using FastAPI, MySQL, and MongoDB
-

Education

Bachelor of Computer Applications (BCA)

Master of Computer Applications (MCA) — IGNOU

Starting September 2026

Core Strengths

Problem Solving • Backend Thinking • Rapid Learning • Freshers Training
Business Understanding • Independent Execution • Communication • Ownership

Career Objective

To grow into a Senior Python Backend Developer specializing in production-grade systems, ERP solutions, automation platforms, and scalable backend architecture for global remote teams.
